## KAPITI TRAM WORKSHOPS RUN REPORT

Another great day out in our cars

As planned 8 cars meet at the PN Railway Station plus one car at QE Park.

We had a good run down through Foxton and into Levin where we stopped for lunch at the Horowhenua Vintage Car Club rooms. A surprise to us all John White had gathered together a good gathering of VCC club members and their cars so we were warmly welcomed in for tea, coffee and freshly made scones.

With so much to talk about we were late leaving Levin and headed straight down SH1 to QE Park tram workshops.

Again, we were greeted by Russell Jenkins and staff and were able to park closer to the trams than what is usual.

Russell gave a talk about the trams and some background to their existence and working life. We then boarded OUR tram for the trip to the beach. [Yes we had a tram just for us]

As we arrived back Russell had put the jug on so we sat down in the smoko room for afternoon tea which was followed by a visit to the tram sheds and workshops. By this time it was 4pm and time for all the volunteers to close up shop and for us to head home.

Unfortunately, not our usual number of members but those that took part had a great day out and fellowship with members you don't always get time to talk too.

Thanks must go to John and the HVCC members, Russell and all the volunteer staff including our tram driver who kept us on track.

Thanks also to our MG participants from Robert

*Safety first!*
