

## **Situation Vacant**

### **MG Manawatu – Webmaster January 2019>**

An opportunity has arisen for someone to become further involved with the MG Manawatu group and take over the running of the group's website.

A new webmaster will need to be appointed to fill this position by the January planning meeting in 2019, if not before.

Currently the website is built and managed via the 'Weebly' ([www.weebly.com](http://www.weebly.com)) platform – a drag and drop website creator, so whilst some basic website design experience along with some familiarity with the Weebly platform would be an advantage, overall it is relatively simple to learn, maintain and update as required for someone with a little technical aptitude.

Or the opportunity also exists for someone with web experience to create an entirely new website for the group through whatever platform they choose – not limited to Weebly.

A new account would have to be created with Weebly so the existing website and domain name could be transferred to the new webmaster. Whilst the actual website itself is free, the domain name registration ([www.mgmanawatu.com](http://www.mgmanawatu.com)) needs to be paid for and is currently paid through to Feb 24, 2020.

This role would suit someone who is quite active in the group, enjoys a little creativity and would be interested in managing this aspect for a reasonable period of time.

Weebly do have tutorials on their website if you are curious as to what may be involved.

If you are interested in taking up this position, please contact John Eames via the Contact Form on the MG Manawatu website.

Thank you.
